

Ausco Modular Continues to Grow

Ausco Building Systems today is a dynamic and growing modular building company, serving thousands of customers across Australia. To better reflect the progressive, innovative and professional attributes of our company we have launched a new brand and company name. We will now be known as Ausco Modular Pty Limited and our new logo is reflective of our direction and strategy.

Ausco Modular continue to lead the industry in product design, customer service, on-time delivery and environment, health and safety.

Recently the Western Region has achieved accreditation to an integrated management system from SAI Global incorporating Safety (AS4801), Quality (ISO9001) and the Environment (ISO14001).

“Ausco Modular is the first modular building company to achieve certification to all three standards by SAI Global. “

Our Management System Certification tells our customers we are committed to meeting their expectations of quality, service and delivery. We have recognised systems in place to manage risk and improve our performance.

These certifications further reinforce Ausco Modular’s capabilities while remaining at the forefront of environmental sustainability and product innovation.

Our 15 branches and manufacturing facilities in 6 cities are able to meet the temporary or permanent building requirements of a diverse range of customers – from Mining and Resources, Construction, Education, Commercial and Industrial, Government, Tourism and Switchrooms.

Throughout Western Australia, Ausco Modular’s offering is strongly reflected in the way we interact with our customers on a daily basis. Our service, experience, value for money and professionalism mean our customers continue to rely on us for the delivery of their projects.

Mining & Resource companies in WA have awarded Ausco Modular a further 984 ensuited rooms in the last month based on the quality of our products and on time delivery.

Ausco Modular meet the demands of a booming economy by utilising our capacity across 9 manufacturing facilities.

We are also helping to ease the accommodation shortage in remote WA by providing an additional 250 rooms in the soon to be open Kingfisher Stayover in Karratha.

This facility is a high quality village owed and operated by Ausco Modular, with rooms available from July 2008.

Ausco Modular’s business in WA is not confined to the mining sector. We have a significant presence in education with the manufacture and supply of high quality modular learning centres. The demands associated with the increase of students attending independent schools has been eased by modular classrooms delivered by Ausco Modular.

“More people choose Ausco Modular for their temporary or permanent building requirements. Our unique combination of local service and national strength delivers superior value on time, innovatively and professionally.”

For more information on your modular solution please call your Ausco Modular consultant today on 13 62 11 or visit ausco.com.au.

“Attracting and retaining staff is getting more and more difficult. Physical space matters. The quality and environmental sustainability of remote living is a key challenge faced by the mining industry today.”

Ausco Modular is the leading provider of accommodation solutions to the Pilbara mining and resources sector. We have listened to the changing demands of our customers and have continued to improve the quality of our accommodation and the impact of our villages on the environment.
